

IBM Services ►► Overview

Overview:

Asparian offers a full-service, integrated approach to helping our clients achieve success. The success of our services is built around a methodology where every client engagement is executed seamlessly from planning through application launch and ongoing managed service support.

Asparian’s IBM Consultants solve real business problems utilizing industry best practices, expertise and partnerships. Leveraging in-house resources and partner alliances, our Consultants are committed to providing the most scalable IBM technology environments based on our clients’ needs and objectives.

Our Consultants provide expertise in project management, design, development, documentation, training and the maintenance of IBM Technologies.

IBM Project Based Support

Project Based Services consists of short- and long-term engagements requiring specific phases, milestones and deliverables. Our services are divided into the follow components:

By eServers:

- IBM System i
- IBM System p
- IBM System z
- IBM System x
- IBM BladeCenters

By Software:

- Linux
- IBM WebSphere Solutions
- IBM Lotus Solutions
- IBM Tivoli Solutions
- IBM Rational Software Solutions

By Service:

- Infrastructure
- Disaster Recovery
- Managed Services
- Contract Management
- Storage Services

By Solution:

- Platform Modernization
- Business Continuity and Recovery
- Virtualization and Remote Access
- Storage Management
- On Demand – “Utility Computing”

Monthly “Block-Hour” Support:

Managed Monthly Support Services are designed for companies requiring on-site and remote continuous support; providing single blended rates, 24x7 availability and dedicated specialists on engagements one year or more.

Managed Services:

Scalability, on demand resources, and dependable availability make managed services an attractive out tasking option for companies that need their business platforms up and running around the clock, across the calendar, and around the world.

IBM Services Capabilities - Managed Services:

- | | |
|--|---------------------------------------|
| ▪ System i, z & x Hosting Services | ▪ IBM Express Email Recovery Solution |
| ▪ System i, z & x Disaster Recovery Facility | ▪ IBM Express Online Backup |
| ▪ IBM Express Managed Security | ▪ IBM Express RFID Services |

Technology Fulfillment:

Through our alliances and partnerships, Asparian provides the knowledge needed to cut licensing costs of disparate purchases, eliminate untimely pricing information, expedite the procurement process, increase productivity and designate single-point accountability.

Training & Education:

Training and Education Service offerings can be certified or independent, onsite, at remote location or via the web depending on your organization’s requirements.

Technical Staffing:

Asparian delivers a comprehensive approach to IBM Staffing and Augmentation. We understand the complexities of locating, qualifying, attracting, negotiating and retaining qualified Technology Personnel, whether it’s contract, contract-to-hire or direct-hire
