

Network Services >> Overview

Overview: (Project Based & Monthly Managed Support)

Growing your business and delivering next-generation services depends on your ability to expand the network, migrate to new IP services, converge data and deploy diverse and complex technologies. Networks need to be stable, reliable and in most business cases maintain 24x7x365 availability.

Asparian's Networking Group assists enterprises in achieving business readiness by providing networks that protect, optimize and grow businesses for future success. Our consultants offer expert advice on how to design, implement and optimize network infrastructures to meet your availability requirements and security guidelines.

Backed by senior level engineers and industry alliances, Asparian helps companies take full advantage of their network infrastructure to meet the challenges of today's business environments and positions organizations to capitalize on future opportunities

Our focus is to align client business priorities in order to protect and optimize operations, increase productivity and provide technological platforms for continuous growth. Our service includes security consolidation, business continuance, managed, services and training to include emerging concepts such as service-oriented architectures and on-demand computing.

Asparian assists in the challenges of keeping network infrastructures secure and provides the resources successfully manage and integrate firewall devices, IDS devices and secure interconnection technologies without business interruption.

Our design architectures supports current data center initiatives and provides a foundation for the next-generation data center. Asparian's consultants provide a unified architectural vision proven design guides that help organizations protect applications and information, share computing and storage resources, and support evolving data center technologies.

To ensure speed and accuracy of implementations while meeting the business requirements of our clients, Asparian leverages the following methodology:

Key Methodology:

- Prepare
- Plan
- Design
- Implement
- Test and Rehearsal
- Operate
- Maintain
- Knowledge Transfer

Key Benefits:

- Ensure on-time, on-budget network deployments
- Reduce implementation expenses
- Increase return on investment
- Increase skills to configure, integrate, verify and troubleshoot complex networks
- Integrate technical requirements and design goals into infrastructure design
- Identify operational inefficiencies and improve staff productivity
- Reduce resolution times
- Resolve network problems and improve overall performance
- Determine the most effective software strategy for your network infrastructure
- Improve network infrastructure stability, efficiency and maintainability

About Us: Asparian, LLC is a technology focused, business driven consulting and technology services firm. While encompassing multi-industry expertise and best practice business process knowledge, Asparian provides trusted insight into existing and emerging technologies while identifying new business and technology trends supporting organizations to sustain long-term success.

>> Key Network Features:

- Design
- Assessment
- Development
- Review
- Implement
- Remote Deployment
- Project Management
- Operations Management
- Focused Engineering
- Software Strategy
- Hardware Strategy
- Upgrade Strategy
- Performance Engineering
- Optimization

>> Key Methodology:

- Prepare
- Plan
- Design
- Implement
- Test and Rehearsal
- Operate
- Maintain
- Knowledge Transfer

>> Additional Services:

- Telecommunications Services
- Colocation Services
- Security
- Consolidation
- Monthly Managed Support
- Business Continuity
- Training & Education
