

Oracle Services ►► Overview

Overview:

Asparian offers a full-service, integrated approach to helping our clients achieve success. The success of our services is built around a methodology where every client engagement is executed seamlessly from planning through application launch and ongoing managed service support.

Asparian's Oracle Consultants solve real business problems utilizing industry best practices, expertise and partnerships. Our Consultants are committed to providing the most scalable Oracle technology environments based on our clients' needs and objectives.

Our teams of certified professionals are highly skilled in all aspects of Oracle Business Solutions, including managed services, packaged application development, custom applications development, performance tuning, database administration, training and education.

Our Consultants provide expertise in project management, design, development, documentation, training and the maintenance of Oracle Technologies. Asparian's Oracle Services include J2EE architecture and enterprise application integration, persistent frameworks, object-relational mapping, workflow processes, wireless e-commerce and personalization.

We have a mature and sound practice that delivers solutions around the complete Oracle Technologies suite.

Key Oracle Technology Services:

- Monthly Managed Support (On-Site & Remote)
- Professional Application Development (Packaged & Custom)
- Training & Education (Remote & On-Site/Certified & Independent)
- Technology Fulfillment

Monthly Managed Support:

Leveraging both in-house expertise and industry alliances, Asparian provides:

- *Remote Managed Services*
Using custom scripts, Oracle's Enterprise Manager (OEM) and outsourced Management Systems, Asparian provides complete remote managed services customized to scale with 24/7/365 availability.
- *On-Site Managed Services*
Includes Remote Managed Services and entails professional services of applications, middle-tier and databases.

Professional Services:

- *Applications (Custom and Packaged)*
Using industry-standard methodologies, our Applications Group designs, builds and implements packaged/custom applications to support business initiatives in the most cost-effective manner, on time and on budget.
- *Middle-Tier*
We define strategies and implement innovative ways to build businesses by combining our expertise in database, development tools, application servers and collaboration suites. Our development methodology focuses on line-of-business analysis, capturing requirements and understanding how users interact with applications through the web and via client interfaces.
- *Databases*
Asparian provides troubleshooting, tuning, optimizing and the on-going maintenance of Oracle relational databases.

Training & Education:

Training and Education Service offerings can be certified or independent, onsite, at remote location or via the web depending on your organization's requirements.

Technology Fulfillment:

Asparian provides the knowledge needed to cut licensing costs of disparate purchases, eliminate untimely pricing information, expedite the procurement process, increase productivity and designate single-point accountability.
